AVATARIS

BRINGING AI TO LIFE

CUSTOMIZABLE

AI AGENTS & TOOLS

DIGITAL HUMANS

Avataris developed a do-it-yourself platform that enables easy creation of human-like digital **AI Agents** in minutes. Automating business tasks such as customer support, shopping assistance, onboarding, sales, e-learning, recruiting, and a wide range of other AI workflows. It will grow into an AI/Web3 marketplace.

3D/XR ENVIRONMENTS

COMPANY VISION

BUT WHY?

Because we believe that personal AI agents can dramatically reduce costs, making it affordable for the first time in history for billions of people to access high-quality, individualized education, daily support, coaching, healthcare, therapy, and easier customer-company interactions.
Additionally, by giving AI a human face, we hope to encourage respectful and friendly user behavior – an important step as AI evolves into a digital living form.

NEED FOR DIGITAL HUMANS

➡ HUGE MARKET

Robots
Physical Interaction needed

Digital Humans
Non-Physical Interaction with Humans needed

AI
No Interaction needed (only in Background)

+ Robot

+ Avatar

- (1) AI will replace >35% of all Jobs
- (2) <u>Only 3 Options:</u>
  - No Interaction needed -> AI acts in Background
  - Physical Interaction with World needed -> Robots
  - Digital Interaction with Humans -> Digital Humans
- (3) Digital Humans: **>20% of all Jobs!**

USE CASES

Most Industries

Finance	Ecommerce & Retail	Media
Education	Films & Entertainment	Legal
Insurance	Human Resources	Travel
Real Estate	Fashion & Celebrities	SaaS
Construction	Telecommunications	Energy
Architecture	Healthcare & Fitness	Sports
Agriculture	Marketing & Ads	Gaming
Automotive	Logistics & Transport	Pharma
Aerospace	Government & Politics	Beauty
Social Media	Food & Beverage	Music
Hospitality	Manufacturing	Science
Non-profit	Sustainability	Military

AI Agent Roles

Webpage FAQs, Client Support, Company Face

In-house Virtual Company Knowledge Manager

Recruiting (e.g. first Interview), Onboarding

Customer Surveys & Booking, Order Taking

Personal Sales Agent & Shopping Assistant

(AR) Hotel or Travel Guide, Newsreader, TV Host

(VR/AR) Trainings, E-Learning, Education (B2G)

(VR/AR) Desk Agent, Bank Teller or Receptionist

Health Coach, Mentor, Therapist, Virtual Doctor

Virtual Influencer, Stars & Brand Ambassadors

Business/Marketing/Legal/Financial/Tax Advisor

Avatar for 3D/VR Meetings & Video Calls, Games

PROBLEM

90% PREFER TALKING WITH A (VIRTUAL) HUMAN OVER ...

... USING A CHATBOT

86% want emotional Connection, only ...

30% of Companies meet this Need!

300,000,000 companies will use AI agents within 1-3 years, and thousands of providers are already in the market. But none of them offer what we will license to them: a simple, engaging digital human interface that will *double* usage and therefore cost savings for their tools. We aim to lead a trillion-dollar market.

Even the best AI is **_worth nothing_** without *engaging & easy to interact Digital Humans,* if it's simple not used by your clients or team!*

SOLUTION: "AIMIGO"

Do-It-Yourself Platform for Digital Human AI Agents to automate prepared Use Cases

10 Minutes to publish your own AI Agent:

- https://youtu.be/32-sQYYQR9Q (3 Minutes)
- Customize your realistic Digital Human
- Choose your interactive 3D Environment
- Select one of many pre-built Use Cases / Roles (e.g., Client Support, Sales, Recruiting Calls, Onboarding, E-Learning, Shopping Assistance, Language Trainer, Coach, Advisor, etc.)
- Select AI-Providers, Models, and Tools
- Share your AI Agent on the Web, PC, or Phone
- Optionally use it in VR, AR, or Multiplayer
- Create your own AI Agents and sell them!

SOLUTION: "AIMIGO"

Master AI coordinates AI Models & Tools to automate entire Use Cases: Offering an AI Marketplace

AI Integrations since 2020 (Early AI Adopter):

- Master AI automates complete Use Cases by coordinating dozens of AI Models & Tools
- AI controls the entire App Behavior, e.g., Animations, Expressions, Camera, Room Interactions and Slides
- Manual or AI-automated Setup for Guided Processes (e.g., in Education, Onboarding, Recruitment, etc.)
- Integrates LLMs (OpenAI, Gemini, Llama, etc.)
- Local & server-based Speech-to-Text & Text-to-Speech
- In-App File Uploads (RAG), Code Interpreter, OCR, Voice Assistants (OpenAI Realtime API, ElevenLabs)
- Picture, Video & 3D Generation (e.g., Flux, Kling)

BUSINESS MODEL

(1) FIXED PRICE CLIENTS*

Custom AI Tools (B2B)

- Dozens of Business Use Cases
- Resalable AI Solutions
- Fixed Price + Custom Costs
- Finished unique Solutions
- Fits most Companies

$ 50k-500k per Client

Released & Profit Zone

(2) DO-IT-YOURSELF*

AR

AIMIGO - (B2B/C/G)

- Your AI Buddy in AR/VR/3D
- Do-It-Yourself-Platform
- Marketplace for AI Tools
- Many pre-build Use Cases
- Fits Everybody – personal AI

$ > $/€ 200 per Month

Work in Progress

(3) DIGITAL HUMAN UI FOR AI AGENTS

UI for AI Agents

- Digital Human as Simple UI for Any AI Agent Solution
- API to Connect in Minutes
- Adds new Functions, Devices (incl. XR) and Gamification

$ > $/€ 100 per Month

VIDEO GENERATOR

UHD Videos in Minutes

- Automatic Video Generation
- Virtual Online Film Studio
- Manual or all AI-controlled
- 100 x faster than AI Videos
- Fits all Media, Infuencers, etc.

$ $/€ 1 per Minute

(2) & (3): We add 50-200% to the cost of third-party AI solutions used in our automations, depending on the AI agent's role and the optional features selected. For example, if billion-dollar corporations automate significant portions of their customer support, or governments invest in e-learning solutions for millions of students, just a few clients could generate millions in revenue for us each year - without incurring any costs, as unlike AI model providers, all our functions are processed locally on the user's device, resulting in zero costs for us. At the same time, millions of private users might seamlessly integrate digital humans into their webpages or apps, which only incur minimal costs per use (no subscription fee), and therefore have no motivation to remove them, creating a strong and lasting marketing effect.

UNIQUE SELLING POINTS

Instant, Scalable, Engaging

Our solution is fully local & in 3D, ensuring ZERO operating costs*.
It's interactive and XR-capable.

*2D video solutions like HeyGen have to charge around $6 per hour because their AI-generated videos are created on a server, incurring significant energy and processing time costs. In contrast, our solution reacts instantly, running locally with virtually zero operating costs and enabling unlimited scalability – even in Web3.

Thanks to advanced AI-driven techniques, our 3D graphics will be locally transformed into video-quality visuals within the next few months.

UNIQUE SELLING POINTS

... that are truly unique enough to skip the competitor slide.
Let's talk about them and our defensibility strategies!

3D – NO VIDEO

- ✓ *Interactive* 3D/VR/AR, Web3, Hologram
- ✓ NOT a 2D-Video like HeyGen, D-ID, Synthesia
- ✓ Actions are all Realtime, no Delay!

DIY & AI STORE

- ✓ Do-It-Yourself Platform: Create most AI Agent Use-Cases in few Minutes
- ✓ Store & Marketplace for Creator Community

ZERO OPERATING COSTS

- ✓ Competitors have Costs of >6€/h because everything is Server-generated
- ✓ Our Costs are <1€/h – all is done locally!
- ✓ AAA-Graphics locally on most Devices: Own **NanoTech** (Performance x 35)

-95% AI Costs

- ✓ Up to 95% less AI Costs (automatic Database for reusable Q&A, etc.)
- ✓ Own **Guided Processes** System: *Zero* AI Costs

Our daughter company Render Dreams (50% ownership) created a new technology to increase the performance of rendering by 35 times. This way, even weak devices like smartphones, VR-glasses or web-browser are able to perform highest AAA-quality graphics locally, making server streaming obsolete and therefore reducing operation costs to zero and outperforming all competitors.
